Adit Chheda

Jr AI & Data Engineer @ Brilliant Infotech Inc. | ML, NLP & RAG |
Python · SQL · Airflow | Churn Modeling · Product Analytics · User
Retention

Jersey City, New Jersey, United States

Summary

Data Scientist with 3+ years of experience across MusicTech, e-commerce, and fintech; building ML models, data pipelines, and AI-powered products that drive measurable business outcomes. Currently a Data Scientist at tapyoca, a MusicTech startup helping independent artists grow their fanbase through direct-to-fan digital experiences. My work spans end-to-end data science from churn prediction and user segmentation to pipeline automation and RAG-powered analytics platforms. What I do: - Build ML models for churn prediction and user segmentation using Random Forest and scikit-learn where I identified that users inactive 30+ days were high churn risk. - Design and automate ETL pipelines using Apache Airflow and MySQL, reducing manual reporting time by 92% - Develop Tableau dashboards to monitor KPIs including retention, engagement, and feature adoption. - Integrate RAG pipelines to deliver natural-language insights on artist music metrics through Nexus, an AI-powered music intelligence platform that I led end-to-end. - Conduct structured user research (20+ interviews) to validate product decisions and inform data strategy. Previously a Data Analyst at Karmalize.me (e-commerce) and Creative Finserve (fintech), where I built dashboards, automated reporting workflows, and delivered insights across sales, customer retention, and loan portfolio performance. I hold a Master's in Data Science from New Jersey Institute of Technology (GPA: 3.95/4.0). I'm passionate about building data products that sit at the intersection of engineering, analytics, and business impact. Always open to connecting with data scientists, ML engineers, and product teams working on data-driven systems. Reach me at: aditbharatchheda@gmail.com Portfolio: https://aditchheda.github.io/adit_portfolio/Skills: • Data Analysis & Programming: Python (Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, NLTK), R (tidyverse, ggplot2) • Database & Data Management: SQL, MySQL, BigQuery, MongoDB, Neo4j • Data Engineering &

Pipeline Tools: Airflow, Kafka, Databricks, ETL, Data Pipelines, Metadata Management• Visualization & Reporting: Tableau, Looker, Excel (Pivot Tables, VLOOKUP), PowerPoint, Google Analytics• Data Governance & Quality: Data Discovery, Data Lineage, Data Quality Validation, Data Governance Frameworks• Project & Documentation: JIRA, User Story Documentation, Git, GitHub, Microsoft Word

Experience

Brilliant Infotech Inc.

Jr AI & Data Engineer

July 2026 - Present (1 month)

Edison, NJ

tapyoca

Data Scientist | Python, SQL, Tableau, Airflow

March 2025 - June 2026 (1 year 4 months)

Jersey City, NJ

- Developed a churn prediction pipeline using RandomForestClassifier (scikit-learn) on limited user datasets, identifying that users inactive for more than 30 days were at high risk of churning, enabling proactive retention interventions.
- Engineered a user referral and content sharing feature using behavioral data analysis, improving average user engagement on the tapyoca platform by 23% and driving organic user acquisition through a rewards based incentive model.
- Automated a daily data pipeline using Apache Airflow DAGs to extract music performance data from a MySQL database and export it as .csv files consumed by Tableau dashboards, reducing manual dashboard update time by 92%.
- Led a cross-functional team of 5 members to architect and deliver Nexus, an AI-powered music intelligence platform integrating a Retrieval-Augmented Generation (RAG) model to deliver actionable, natural-language insights on artist music metrics and tour planning recommendations.
- Conducted 20 structured user interviews across music artists, artist managers, song distributors, and lawyers to quantify pain points in the AI-era music industry, validating product-market fit for an independent artist monetization platform.

Karmalize.Me

Data Analyst

November 2025 - May 2026 (7 months)

Hillside, NJ

- Analyzed Shopify e-commerce sales data using Python (Pandas) and SQL to identify top performing product categories, increasing revenue focused inventory decisions accuracy by 35% across organic nuts and nut butter product lines.
- Visualized customer purchase behavior and repeat buyer trends through Tableau dashboards, enabling the marketing team to improve customer retention targeting by 28% for Karmalize.me's plant based product catalog.
- Investigated customer order data using Google Analytics and Excel to surface a 40% drop-off rate at checkout, providing actionable recommendations that streamlined the Shopify purchase funnel and reduced cart abandonment.
- Tracked and reported on Karmalize.me's charitable giving KPIs including profit-donation ratios and community impact metrics using SQL and Tableau, enabling leadership to communicate social impact goals to 10,000+ customers.

New Jersey Institute of Technology

Teaching Assistant | R Programming • Data Analytics • Student Support
September 2024 - December 2024 (4 months)

Newark, New Jersey, United States

- Facilitated learning for 28 graduate students in the online course "Data Analytics with R Program", led by Senior Lecturer Daming Li, by supporting grading and comprehension of core analytics concepts.
- Evaluated and scored 30+ assignments, quizzes, projects, and exams, ensuring accurate assessment and contributing to consistent academic performance tracking.
- Co-ordinated virtual office hours and responded to student queries via email and live online meetings, enhancing understanding of topics such as data wrangling, ggplot2 visualization, and R statistical modeling.
- Influenced student success by promoting better engagement with R programming fundamentals and offering personalized feedback on practical applications.

Creative Finserve Pvt. Ltd.

Data Analyst

January 2021 - March 2022 (1 year 3 months)

Mumbai

- Analyzed loan application and disbursement data across HDFC, ICICI, and Axis Bank portfolios using SQL and Excel, identifying approval bottleneck

patterns that reduced average loan processing time by 30% for SME and corporate clients.

- Built interactive Tableau dashboards tracking loan sanction rates, repayment trends, and client acquisition metrics across 27 offices, enabling leadership to monitor \$200+ million USD in annual home loan disbursements in real time.
- Segmented 10,000+ new clients annually using Python (Pandas) to profile borrower risk categories across home loans, personal loans, and unsecured business loans, improving targeted product recommendations accuracy by 25%.
- Modeled debt consolidation customer data using Excel and Tableau to identify high-interest loan clusters, surfacing insights that helped advisors prioritize 15% more high-value refinancing conversations per quarter.

Trek India

Full Stack Developer

November 2021 - February 2022 (4 months)

Mumbai

- Developed a dynamic website enabling users to seamlessly book trekking destinations, enhancing user engagement and experience.
- Designed and implemented a dashboard for Trek India to efficiently manage events, user inquiries, discounts, and data, streamlining administrative operations.

Education

New Jersey Institute of Technology

Master's degree, Data Science · (September 2023 - May 2025)

Shah And Anchor Kutchhi Engineering College

Bachelor of Engineering - BE, Computer Engineering · (2019 - 2023)

Pace Junior Science College

Higher Secondary · (2017 - 2019)

Ramanlal Nagindas Shah High School

Secondary School · (March 2017)
